FREE GUIDE #05

Volume Breakouts

Use volume to tell real breakouts from weak ones

Practice this daily

New chart quiz every day on Telegram:

Volume = conviction

Volume shows how much was traded in each candle. A move with high volume means many traders agree. A move with low volume can be easily reversed.

- Real breakout: volume spike, often **2x or more** the recent average.
- Weak breakout: normal or low volume, often fails back into the range.

PATTERNS

3 volume signals to know

1. **Breakout spike**
   Big candle + big volume through a level = strong move
2. **Quiet pullback**
   Low volume on the retest = sellers are not serious
3. **Climax**
   Huge volume after a long trend can mean exhaustion, not strength

TIP

Compare volume to the last 20 candles, not to one candle. Many chart apps have a volume moving average you can turn on.

CHECKLIST

Volume breakout checklist

- [ ] Clear range or level with several touches
- [ ] Candle **closes** outside the level
- [ ] Volume clearly above the recent average
- [ ] Retest happens on lower volume
- [ ] Stop back inside the range
- [ ] Target at least the height of the range

MISTAKE TO AVOID

Chasing a breakout candle that is already huge. Wait for the retest, or skip it.

Now test yourself.

Reading a guide is step one. Spotting the setup on a live chart, fast, is the real skill. That is what the daily quiz trains.

- ✓ **Daily Quiz**
  One new chart every day. BUY, SELL or SKIP?
- ✓ **Answers + breakdown**
  The next morning, with entry, stop and target
- ✓ **Full PDF library**
  All guides plus the Pattern Cheat Sheet
- ✓ **Weekly pack**
  Every Sunday: the week's quizzes in one file
