STEP 1

What one candle tells you

Every candle shows four prices for one period of time: where price **opened**, the **highest** and **lowest** it reached, and where it **closed**.

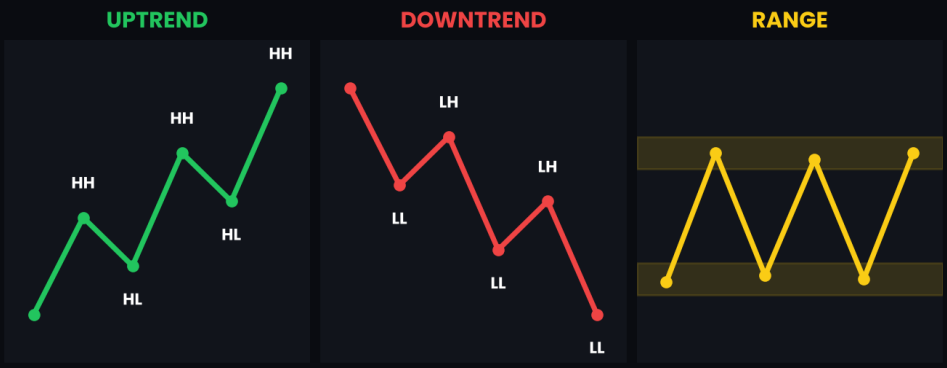

- **Body** = distance from open to close. Big body = strong move.
- **Wick** = prices that were reached but rejected.
- A **long lower wick** means sellers pushed down, but buyers pushed it back up.

STEP 2

Find the trend first

Before looking for any entry, decide which of these three markets you are in.

- **Uptrend:** higher highs (HH) and higher lows (HL). Look for buys.
- **Downtrend:** lower highs (LH) and lower lows (LL). Look for sells.
- **Range:** price bounces between two levels. Trade the edges, not the middle.

STEP 3

Timeframes: zoom out first

The same coin can be in an uptrend on the 4h chart and a downtrend on the 15m chart. Always check the bigger picture first.

1. **4h / 1D**
   Trend and the big levels
2. **1h**
   Your setup: support, resistance, pattern
3. **15m**
   Optional: fine-tune the entry

RULE OF THUMB

Trade in the direction of the higher timeframe. Fighting the 4h trend on a 5m chart is how most beginners lose.

CHECKLIST

3 questions before every trade

- ☐ **Where is the trend?** Up, down or range on the higher timeframe.
- ☐ **Where is the level?** Is price at support, resistance or a trendline, or in the middle of nowhere?
- ☐ **Where am I wrong?** Decide your stop loss before you enter. No stop = no trade.

COMMON BEGINNER MISTAKES

- Buying after a huge green candle (late entry)
- Trading the middle of a range
- No stop loss, "I will wait for it to come back"
- Risking too much on one trade

Now test yourself.

Reading a guide is step one. Spotting the setup on a live chart, fast, is the real skill. That is what the daily quiz trains.
